Goal

Assemble the vehicle and create the first version of SysML diagrams for your vehicle project.

Discussion

1. After securing the Arduino and motor controller in place, we found that the battery was difficult to remove, so we redesigned the breadboard holder.

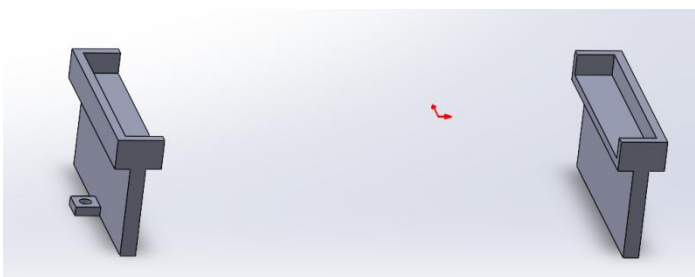

Figure 1 original design of Battery Holder

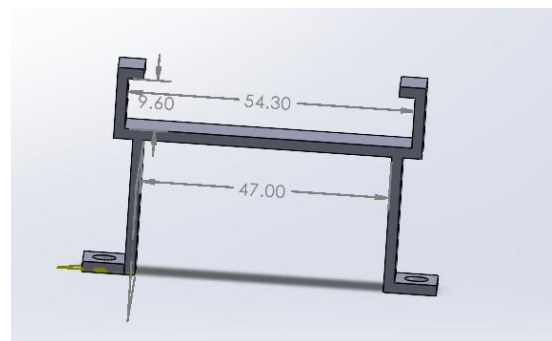

Figure 2 latest design of Battery Holder

2. We assembled our vehicle according to the design in SolidWorks.

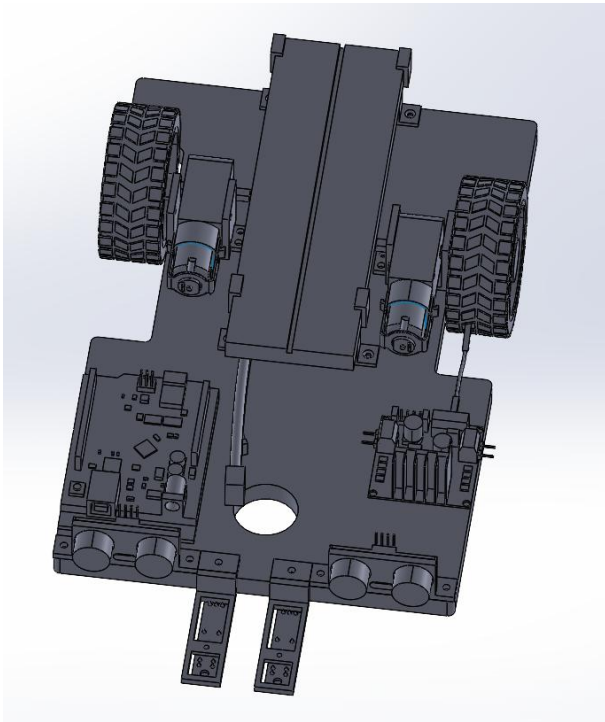

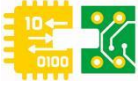

Figure 3 Assembly in Solidworks

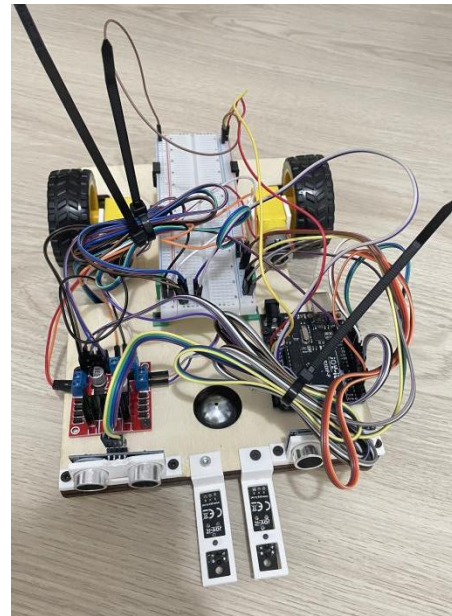

Figure 4 Assembly (Full)

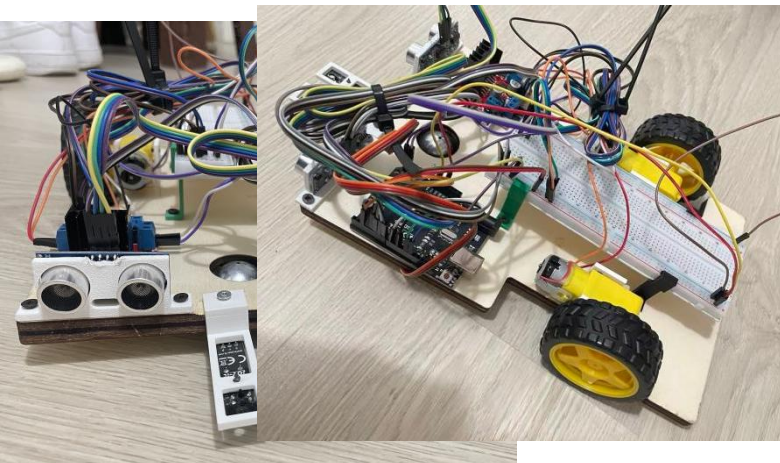

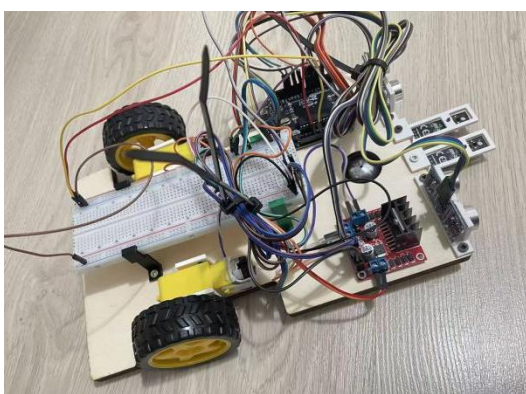

Figure 5 Assembly (Front)

Figure 6 Assembly (Left)

Figure 7 Assembly (Right)

3. Designed a wiring diagram in Tinkercad(The codes are not ready).
